DATASHEET

Manual crimping tool 16-32mm U profile Kit

Description:

ZLS-1632-A Manual crimping tool

Supplied with 16-20-25-32mm U Inserts suitable for crimping Multi-layer Pipe.

Easy to operate and change inserts to provide secure powerful crimp, ensuring pipe joints are connected correctly.

360 degree rotational head allows connection in hard to access areas.

Levers can be individually extended from 31 cm to 55 cm to provide extra force.

Made from high quality forged steel.

The ergonomic handle and the easy-going mechanism ensure that the fittings can be pressed without much effort.

The manual pressing tool set is supplied in a sturdy carrying case, which can be easily stored in a service vehicle.

Provides up to 60kn of force (greater force than most battery machines)

FEATURES:

- Mechanical crimping tool for connecting fitting with pipe.
- The handle can be elongated with energy-efficient drive.
- telescopic handle
- Crimping type: U
- Mechanical Crimping tool for system conform pressing of fittings up to 32mm
