ZL-1237 data sheet

Pipe straighter tools

Collaboration and Innovation

Overview

Pipe straightening machine for Pipe 16-32 mm in coils. Should be secured using the pipe straightener between the pipe coil and the installation location. When the pipe is pulled through the pipe-straightening machine, the shape of it will be straight and will become more easy for installtion.

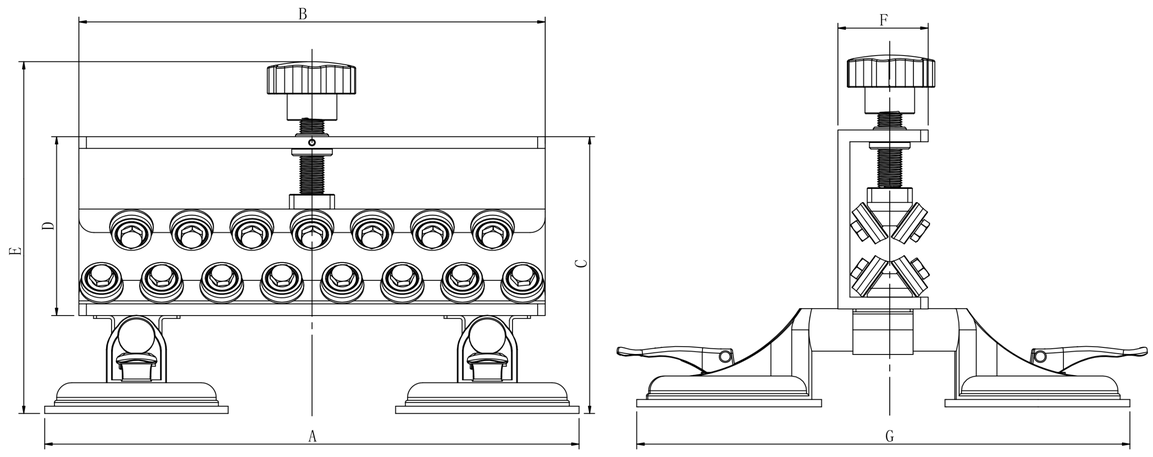

Features & benefits

• Metal material for better durability over time
• Comes with 30 pcs of adjustable rollers to fit all diameters of tubes
• 4 pcs of large suction cup can be fixed on any smooth surface, so that the tool can be flexibly used in various installation scenes, and the suction is strong, without worrying about falling off
